

# **\*Minutes of Meeting\***

**Name: Mohd Zaid**

**Run by : futureense.uni**

**Title : Internship**

**Attendes: CSE(AIDE)**

## **Objective:**

- Understand the different ways to use a subquery in a SELECT statement.
- Introduce the concept of views and CTE (Common Table Expression) for simplifying complex queries.

## **Agenda:**

- Filtering data based on the main SELECT statement, FROM and WHERE clauses.
- Enhanced filtering using subqueries.
- Tackling complex filtering scenarios.
- Breaking down the complexity of queries with the use of views and CTE.
- Learning about the reusability of views in MySQL.

## **Key Takeaways:**

- Various methods to use subqueries in SELECT statements.
- Improved filtering techniques using subqueries.
- Simplified data access through the use of views.
- How to tackle complex filtering scenarios.
- Understanding views and CTE for breaking down complex queries.
- Insights into the reusability of views in MySQL.
